

What Piggy Bank is about?

The project is aimed to address current low levels of financial literacy in disadvantaged communities.

What is already done?

Local implementation of training programmes

During the months of April and May 2021, the six project partners conducted local trainings for multipliers to ensure that the project materials reach their local community (children from 6 years old to grandparents). Thus, parents and guardians underwent an Induction Training Programme (IO4 of the project) with the aim of improving the financial education of all members of their family while educators were thoroughly familiarized with the In-Service Training Handbook (IO5) in order to apply it with students of different ages. The training was carried out through the online platform (IO6 of the project), where anyone can register and access the materials free of charge.

Multiplier Events in every country

In the months of July, August and September 2021, the entities have held a large dissemination event in their respective countries. Each event was attended by at least 20 people. Some of them were organised in person and others had to be held online, due to COVID restrictions. The objective of these events was to present the online platform and the rest of the materials created during the project (comics, escape rooms, web-quests and training programs) to relevant entities and actors from the financial, institutional or educational sector, as well as to the final beneficiaries of the project (families, adults, young people).
